ADVISORY NOTICE

LAURA XL software upgrade

Cat. No.	Product
INS00065	LAURA XL

22nd March 2021

Dear valued customer,

We are pleased to announce the release of the latest version of software for the Laura XL automated urinalysis platform. In addition to a number of performance corrections, we have integrated some new features and benefits available from the software version 1.1.0.27.

Details of the main changes are outlined below.

1) To improve the performance of the sediment module and to prevent utilization of potentially contaminated cuvettes, there is now an automated cuvette check after each cleaning procedure. This check will automatically remove from use any cuvettes that have failed to meet the predefined criteria.

   It is possible for the user to review the images during the post cleaning scans and reactivate cuvettes which were automatically deactivated if it is felt that they are acceptable for testing.

   Further information can be found in section 8.8 of the User manual. The configuration of cleaning and access to reactivation of cuvettes is explained in the User manual in section 8.9.4.4 Cleaning and rinsing settings. New version of the User manual has been integrated in the UI.

   Important: Cleaning solution Opti-sol XL 1500 (REG00055) and liquid system Opti-sol XL 750 (REG00054) are required for the best cleaning performance.
2) Changes to the presentation of the results for sedimentation elements.
3) Sample tube compatibility settings - to allow the use of standard and Sarstedt tubes.
4) New thresholds for strips are available, improvement of chemistry evaluation.
5) RFID management of Opti-sol XL 750 – once this product was registred in your country, it must be activated by field service engineer in Setup>About: "ACTIVATE LS"
6) Possibility to add comments to QC results.
7) Cleaning management was changed (Automatic sanitation was removed)
8) Software stabilization (elimination of lagging, Focus fail – timeout issue)

This update contains also firmware changes, please contact your local Erba representative to install the new software version to enable you access to all new system functions.

Thank you for your continued support as we 'Go for Growth' in 2021. In case you have any questions, please do not hesitate to contact us.
